**BEING THE LEADER
OF BLASTING
SERVICES COMPANY**

INTRODUCTION

Prima Mega Blast is a 100% Indonesian Drill and Blast Service Company, which is better well-known as PM BLAST. We are among the emerging South East Asian explosive market that have a strong presence in the mining, quarrying, construction and seismic operation sectors in Indonesia. With the strong support and technical collaboration with the world-leading partners in ammonium nitrate and explosives supplier such as Tenaga Kimia Sdn. Bhd., PM BLAST is growing tremendously and focuses intensively in the regional explosives market development.

Being a newly established legal entity in Indonesia since 2015, we are extending our pro-active approach in the explosives supply, drilling and blasting services in the quarry, coal and gold mining industries in Indonesia.

For now, PM BLAST has several projects in Kalimantan and Sulawesi which have included the supply of bulk explosives, Down the Hole (DTH) and Blasting services loading as well as the full range of blasting accessories. PM BLAST has been working closely and progressively with other licensed explosive suppliers in Indonesia for contract-manufacturing as well as explosive supply and blasting service businesses.

Since its inception in 2015, PM BLAST has become one of the renowned provider of civil high explosive products and blasting accessories.

VISION & MISSION

Vision

Being the leader of blasting services company that focuses on excellent customer service and highly competitive products.

Mission

- Providing excellent services to customer from mining and construction industry.
- Providing high quality and competitive products and services.
- Uphold customer satisfaction by meeting their needs & expectations.

PRODUCTS

- **AN (Ammonium Nitrate)**
- **ANFO (Ammonium Nitrate Fuel Oil)**
- **Emulsion**
 - o Water Resistance Explosives
 - o High Energy Content
- **Detonators**
 - o We have a wide range of detonators for wide range of application.
 - o Types of detonators that we offer : non-electric detonator, electric detonator, electronic detonator, detonating cord, safety fuse, etc.
 - o Our detonators are highly reliable and used many times by local explosives company in Indonesia and other countries.
- **Booster and Packaged Dynamite**
 - o We have Packaged Dynamite or Packaged Emulsion explosives that can be used as priming for either ANFO or Emulsion. Other than that, our dynamite can also be loaded as primary charge into blast holes.
 - o We also provide booster for priming purposes as well.

TECHNICAL SUPPORT

Success and safety in blasting services rely greatly on the explosives and the correct application of them. Thus PM BLAST has been providing technical support to their value customers in the form of :

- Field Visit
- Product Application
- Blasting Design
- Trouble Shooting
- Optimization Program

SERVICES

A. Technical Services

- **Explosives Magazines Design & Construction**
 - o Customizing explosives magazines design & construction according to our End Users' need is our expertise.
 - o This includes a temporary magazine design by modifying containers or permanent magazines design.
- **ON SITE PLANT**
 - o Manufacturing facilities or mixing facilities of emulsion on site.
 - o To cater the requirement of explosives on site and to assure continuous supply of emulsion.
 - o Is a more economical way to produce bulk emulsion explosives.
- **MMU (Mobile Mixing Unit) Trucks**
 - o Commonly called MMU truck which mixes emulsion with AN using 70 : 30 or 60 : 40 ratio and directly delivers them into blast holes.
 - o Some of our MMU trucks are versatile and can be used to deliver either emulsion or ANFO.
- **ANFO Trucks**
 - o Mainly used to deliver ANFO into blast holes (bulk delivery).
- **Blasting Services**
 - o We offer comprehensive non conventional blasting services that can improve fragmentation, reduce blasting cost, minimizing flying rocks and air blast, reduce vibration, and eliminate subdrill that will reduce drilling cost.
 - o We offer blasting services from Down the Hole (DTH) to Priming, Stemming, Tying up and Shoot firing (PSTS).

B. Non-Technical Services

- **Explosive Permits**
 - o We provide services to obtain all explosives related permits such as P1, P2, P3 & Explosive Magazines.
- **Explosives Handling & Transportation**
 - o This includes explosives custom clearance & handling from port to transit magazines or directly to End User's Magazines (by land, sea or air)
 - o This sub specialty is done by our licensed subsidiary company namely **PT. Mega Expressindo Nusantara (PT. MEN-Logistics)**.

FACILITIES

Distribution Warehouses or better known as Transit Magazines which is located at Liang Anggang District, Banjarbaru Regency, South Kalimantan Province of Indonesia.

PROJECTS REFERENCE LISTS

- PT. Conch South Kalimantan Cement, Tabalong Regency, South Kalimantan.
- PT. Conch North Sulawesi Cement, Bolaang Mongondow Regency, North Sulawesi.
- PT. Conch Barru, Barru Regency, South Sulawesi.
- Rimau Group, PT. Gunung Emas Abadi, Barito Timur Regency, Central Kalimantan.
- PT. Marunda Graha Mineral, Murung Raya Regency, Central Kalimantan.
- PT. Kuarindo Pratama Jaya, Paser Regency, East Kalimantan.
